

# HerdMASTER 4

## INTRODUCTION TO TRAINING

Hi,

Welcome to our new online training program.

I have developed this course based on our in-person training that we have done for years now.

I strongly recommend going through the program in order, as some of the data covered in earlier lessons is used in later lessons.

You can download the videos in the link under the video player page if your internet connection is unstable or if you simply want to watch them when you are not connected to the internet.

We recommend something like vlc media player to play the videos if you are having trouble viewing the videos.

Documents will accompany each video for you to refer to if you wish, sometimes these may contain a bit more detailed information on a specific point.

We use the HerdMASTER demo data for all our examples; If you have significantly altered your demo data, you can restore it to the original state by entering the database and going to **File | Restore Data** if you are on the demo data database then it will ask if you want to reset the demo database, just hit yes and the next time you enter it will be restored.

I hope you find this training program easy to follow and informative.

Regards,

Damien Holley
