

HerdMASTER 4 Tip Sheet

EYE PIGMENTATION CODES FOR AFRICAN SIMBRA

EYE PIGMENTATION CODE FOR AFRICAN SIMBRA

Please see below the codes for Eye Pigmentation (Simbra) - Zero is not accepted by the society. Contact the Society to obtain a BGC file with all relevant codes

Look at the **Breed Info** tab on the HerdMASTER Animal Details screen below. (by picking an animal from your list and hitting the details button)

The screenshot shows the 'Breed Info' tab selected. Below the tabs, there are fields for 'Foster Dam' and 'Recip Dam', each with a dropdown menu and a search icon. To the right, there are two input fields labeled 'Eye Pig (L)' and 'Eye Pig (R)'. Red arrows point to the 'Breed Info' tab and the two eye pigmentation input fields.

The animal's right or left eye pigmentation can be found by clicking on the animals details, then move to Breed Info.

Please note this must not be left blank or filled in with a Zero- or this will cause errors.
