

HerdMASTER 4 Tip Sheet

SET UP THE AUTO-CALC GRADE RULES

SETUP THE AUTO-CALC GRADE RULES

Select **Setup | Auto- Calc grade rules**

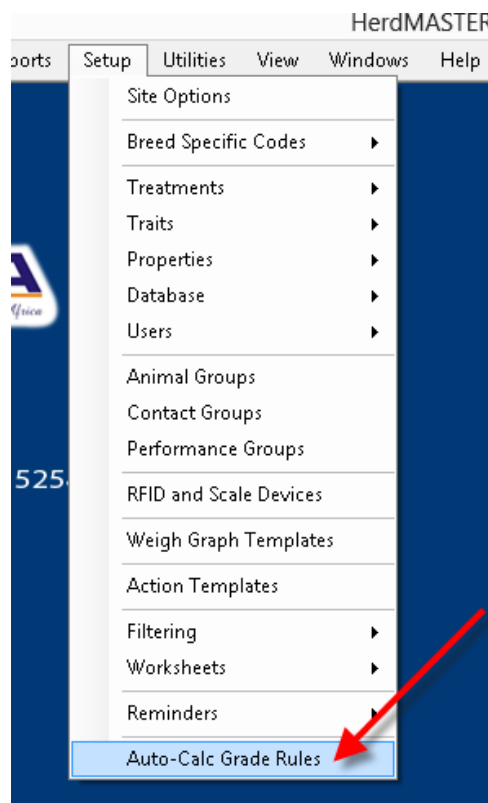

When you do that you will be presented with a screen similar to below.

On this screen you will see what the grade will equal for a calf depending on what the sire and dam have.

If you need to add more rules that what is in here already you can simply press the add button and add the new rule.

To get herd master to start using this auto calculation of grades for calves. You need to turn it on. You do this by selecting the Setup | Site options menu item and then click on the Program defaults 3 tab.

SETUP HERDMASTER TO AUTO-CALC THE GRADES

You will now need to check the box that to allow HerdMASTER to auto-calculate the grades for you. When you have done this press the save button.

On this screen there is also a short cut to view the Auto calculate table by click on the link next to the check box

The next time you now add a calf/animal HerdMASTER will auto calculate the grade for the calf for you based on what the sire and dams grade are.
